ABSTRACT

With numerous cryptocurrencies being introduced into the market every day, blockchain technology is becoming the future of our financial needs. **TLIFE Coin** started from a simple idea, born from a tale of personal hands-on frustration while using current offerings in the crypto-payment systems and our desire to build a better platform. After condensing the original concept into a pitch presentation, we relentlessly reached out to interested partners and organically built our team. Along this journey, we found great partners and mentors who were equally committed and excited to work with the ever-progressing vision of **TLIFE Coin**.

TLIFE Coin aims to create a hot test launch on the Binance Smart Chain and bring on hype and mass adoption in order to create a full blockchain protocol.

Drawing comparisons to the meteoric rise of the modern web, blockchain technology has shown signs of tremendous growth potential and transformative power. Just as the internet needed Web 2.0 to engage users with more social, usable, and interoperable functionality, blockchain technology's path to mass adoption hinges upon creating a seamless user experience. While the industry is still young and the potential of decentralized applications remains largely untapped, **TLIFE Coin** is positioned on the Binance Smart Chain with its revolutionary DApp experiences.

TLIFE Coin is an asset exchange platform that will be combined with a strong crypto technology in collaboration with modern banking partners in a seamless digital ecosystem.

INTRODUCTION

TLIFE COIN - Unlock a world of financial freedom with TLifeCoin!

The adoption of blockchain technology in the global marketplace is not just a temporary trend or fashion, but a firm and continuous shift towards a future in which the management of personal, institutional and potential state finances will become easier, straightforward, quicker and more transparent. Two applications of this technology, crypt currency and tokens, stand out in popularity. Such instruments are convenient for a global society because they allow for greater efficiency, speed and freedom in all types of transactions, especially in international trade.

Its use has generated a universe of opportunities that have the potential to alter conventional business practices, especially in industries based on intermediation for exchange or verification, such as finance, trade, manufacturing and even in areas of human knowledge that usually adopt technological innovations in longer terms, such as law and politics.

The development of the crypto-asset ecosystem is based on the revolutionary idea of technological substitution of trust. The working model on which they are based emerged as an ingenious mechanism that combines networks, computing power and incentives for collaborative work to ensure the integrity of information, along with traceability and transparency in exchanges. Additionally, since it places the management of financial resources directly in people's hands, it proposes a different approach to electronic finance security.

TLIFE Coin is breaking in with a promising outlook, taking advantage of:

- The early maturity of blockchain technology
- A market of more than thirty million people eager for savings, investment and international exchange instruments
- A world-renowned oil industry
- The participation of allied governments
- Enthusiastic promoters of cryptocurrency for the development of a new world-wide economy

INTRODUCTION

TLIFE Coin will have the capacity to overcome blockages, delays and limitations of the traditional financial system, while favouring the growth of a new economic ecosystem based on trust, integrity, transparency, efficiency and speed that guarantees the technology of blockchain.

The objective of this document is to describe the technical foundations of TLIFE Coin's development as an instrument for exchange, savings, investment and technological platform. The following will establish the historical-social and economic bases that inspire the development of the instrument, the structure of the global and national market in which it will be used, the issue method and policies that will consolidate its use.

The combination of this historical background and the international recognition of the enormous potential of new technologies underpin the idea of TLIFE Coin as an international currency developed and promoted by an emerging nation for the development of a decentralized, more egalitarian, inclusive and transparent global economy.

PROBLEMS

Despite the industrial disruption and technological advances that blockchain provides, one area that is still largely untapped is digital payments between buyers and sellers of physical services. Digital payment systems have been a holdout of larger industry incumbents, with more legacy APIs and agreements with traditional financial institutions, banks and credit cards.

Despite the advantages of crypto payments, such as ultra-low fees, speed and low barrier of entry, a clear and developed advancement in transactional security has yet to be implemented in the market. Buyers desire and expect a robust consumer protection system that protects their purchases and provides refunds. Sellers on the other hand would love to earn more revenue but are cautious of the volatility issues associated with accepting cryptocurrencies. Wouldn't it be amazing if we could have the best of both worlds? This is a mutual trust dilemma we aim to solve with the TALLWIN platform.

SOLUTIONS

Identify Model

Replication

Rapid Growth

We aim to build a next-generation payment system allowing buyers to use their favourite cryptocurrency to buy goods and utilise the services with confidence from merchants while incorporating robust PayPal-like consumer protection and dispute resolution scheme. We aim to drive adoption of the API by merchants by providing them with a way to receive fiat currency directly from cryptocurrency buyers and at the same time shielding the merchant from market volatility and decreasing the risk of accepting cryptocurrency.

A Cross-Chain based BEP-20 coin with real utilities like an Exchange, Wallet, Ecommerce for blockchain Enthusiasts and others.

TLIFE COIN (TLIFE) is a peer-to-peer and utility digital coin to cater to the community, rising through the charts, and catering for a full blockchain ecosystem by introducing Staking, Farming, Ecommerce, Exchange, Digital Wallet, NextGen NFTs and cross-chain transactions in the future.

Our Utility coin TLIFE is a Binance Smart Chain based BEP-20 compliant coin. As it is its own Smart Contract so we can encapsulate unique functionality that facilitates our Token Economics and business goals.

Fully decentralised digital finance company with blockchain ecosystem generating digital asset system. An asset exchange platform will be combined with strong crypto technology in collaboration with modern banking partners in a seamless digital ecosystem.

TLIFE COIN (TLIFE) is a utility coin that enables frictionless transactions of a wide range of assets on own decentralized exchange whilst also acting as a medium of exchange and a store of value. In the future, coin holders may also be able to use the TLIFE Coins to purchase from the marketplace, buy/sell from TALLWIN exchange and transfer to or store at the TALLWIN wallet.

TALLWIN LIFE will actively encourage its user base to participate as both players and community members. Users will be able to use their TLIFE Coins to participate in the governance of the TALLWIN LIFE platform. By incentivizing a knowledgeable and engaged community, TLIFE Coin can improve retention rates and ensure the platform grows in response to player feedback.

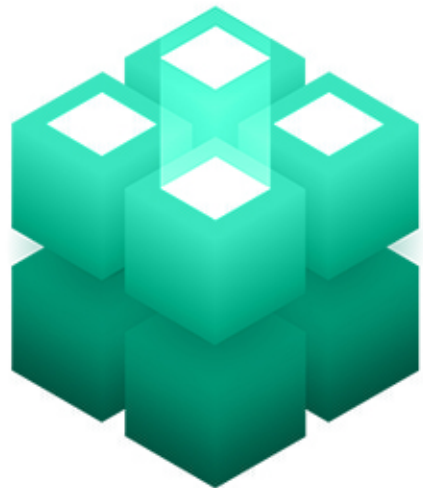

BLOCKCHAIN TECHNOLOGY

TLIFE Coin is built on the BEP-20 standard, which enables TLIFE to work with most of the Binance wallets. Backed by the power of the Binance network, transactions happen quickly and with a low transaction fee. Holders of TLIFE Coins can use industry-standard wallets, including hardware wallets, to secure their holdings.

Because we are built on top of the standard Binance blockchain, TLIFE Coins will continue to advance as a BSC network, including enhancements such as sharding and proof of Stake (PoS). We believe binance smart chain is the ideal platform to support TLIFE Coin as it becomes a world-class option for payments in singapore.

Binance Smart Chain (BSC) was developed as a means of utilizing solidity based smart contracts with much greater speed and efficiency than others. It's a sovereign blockchain, which will provide security and safety to all its users and developers.

Its native dual chain interoperability will allow cross-chain communication and scaling of high-performance DApps that require a fast and smooth user experience. It's EVM compatible and will support all of the existing binance smart chain toolings.

TLIFE is a crypto token native to the Binance Smart Chain (BSC) network. The amount of people using the Binance Smart Chain has grown by several million this year alone. Quickly becoming a favourite network for both developers and users as the BSC network is much faster and much cheaper (up to 50x cheaper) than the older EthereumNetwork and can be used in thousands of decentralized applications much more quickly.

The advantage of BSC is its on-chain governance with POS authority consensus built on 21 validators that validate the transaction, provide decentralization and allow cross-chain communication and scaling of high-performance DApps.

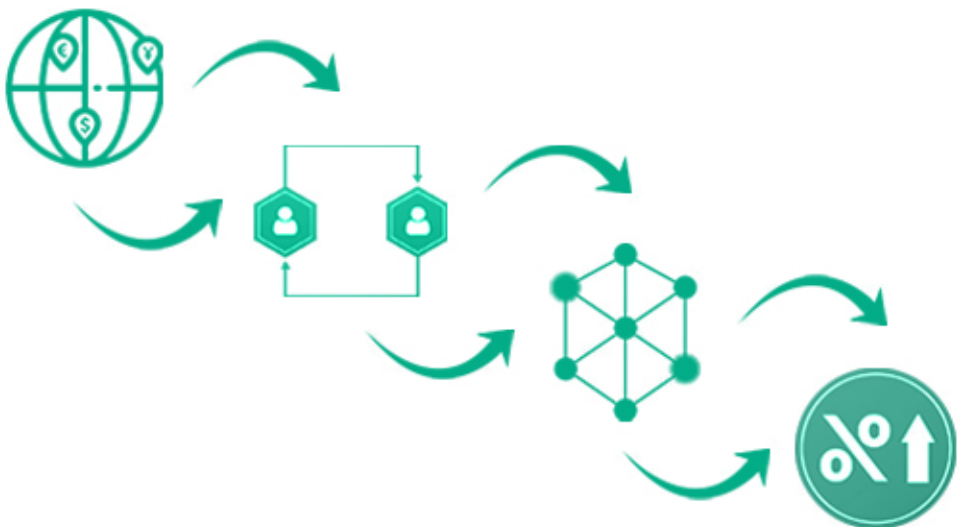

BLOCKCHAIN TECHNOLOGY

The Binance Smart Chain platform is expected to provide a transaction rate of over 10,000 transactions per second once the Proof of Stake Consensus Protocol in the Serenity Phase of BSC's roadmap development is deployed.

With the blockchain industry reaching its post-inception phase, many key technology foundations are now mature enough to build robust consumer-facing products reaching a wider audience. As with any new technology, blockchain is driving changes in many areas of traditional businesses, forcing incumbents to adapt.

Everyone, including banking, insurance, equity trading, venture capital, logistics and governance, is being affected, with new products redefining the way we think of money, transactions, value and trust. We have made great strides from the early days of Bitcoin being traded in private forums to today's exchanges and application platforms which are powered by smart contracts.

Though we have already made significant advancements, this is just one stage in the digitalization of money. According to major market analysts, the cryptocurrency market is predicted to reach a sizable 5 trillion by the year 2025.

TOKENOMICS

Unlike Bitcoin, TLIFE Coins has a fixed supply coins with no new minting. All TLIFE coins that will ever exist have already been created. We believe in a truly fair and decentralized world so launched 100% fair coins.

Token Name	TLIFE Coin
Token Symbol	TLIFE
Total Supply	21,000,000 (21M)
Blockchain	Binance Smart Chain
Decimal Value	8 Decimal
Technology	BEP-20
Contract	0xc9f8c639135FC1412F011Cc84810635D6bBCA19d

ROADMAP

TLIFE Coins is developing a new blockchain technology rollout for the world.
View our roadmap to see how exactly we are making that happen.

Ecosystem BUSINESS MODELS

An economic ecosystem of the future is based on Metaverse, NFT Platform, Marketplace, Crypto Exchange, Game Zone and versatile payment solution including Tallwin Life blockchain ecosystem.

Tallwin Life will build this ecosystem through a process of constant self-assessment and development. Additionally, on-chain governance will be used to target and fund improvements. Tallwin community will have a strong say on which projects they want to see completed before updates are then launched on the network.

TALLWIN LIFE Payments

POS Crypto Payment Services, API for Crypto ATMs, Payment service provider API (similar to Paypal/ Bitpay). Developers can integrate Tallwin Life's platform payment services into their DApps. The goal of this functionality is to make any payment as easy as possible.

Tallwin Life Exchange & Wallet

Tallwin Life is ready to launch its own Crypto assets centralized exchange. Where users can buy & sell, trade, swap, staking, and peer-to-peer of their cryptocurrencies. The team will be working closely with the BSC team to provide premium wallet services that will be optimized and expanded for the Tallwin Life platform's audience.

Ecommerce Marketplace

A complete secure Ecommerce platform, where you can buy anything from TLIFE Coins. Therefore, the team will design the Tallwin Life marketplace as an opportunity for all projects in the space to acquire users more efficiently.

ECOSYSTEM

BUSINESS MODELS

NFT Marketplace

Welcome to the future of digital ownership and creativity. Our platform is proud to announce the launch of our highly anticipated NFT Marketplace, where artists, collectors and enthusiasts from around the world can come together to explore, trade and create unique digital assets.

- Seamless Creation Process
- Authenticity and Provenance
- Royalties and Rewards

Digital World of Metaverse

The Gateway to Infinite Possibilities

Step into a new dimension of immersive experiences with our revolutionary Metaverse, brought to you by our platform. We are proud to launch a cutting-edge virtual universe that transcends boundaries, redefines social interactions, and unlocks limitless possibilities for exploration and creativity.

Tallwin Life Gamezone

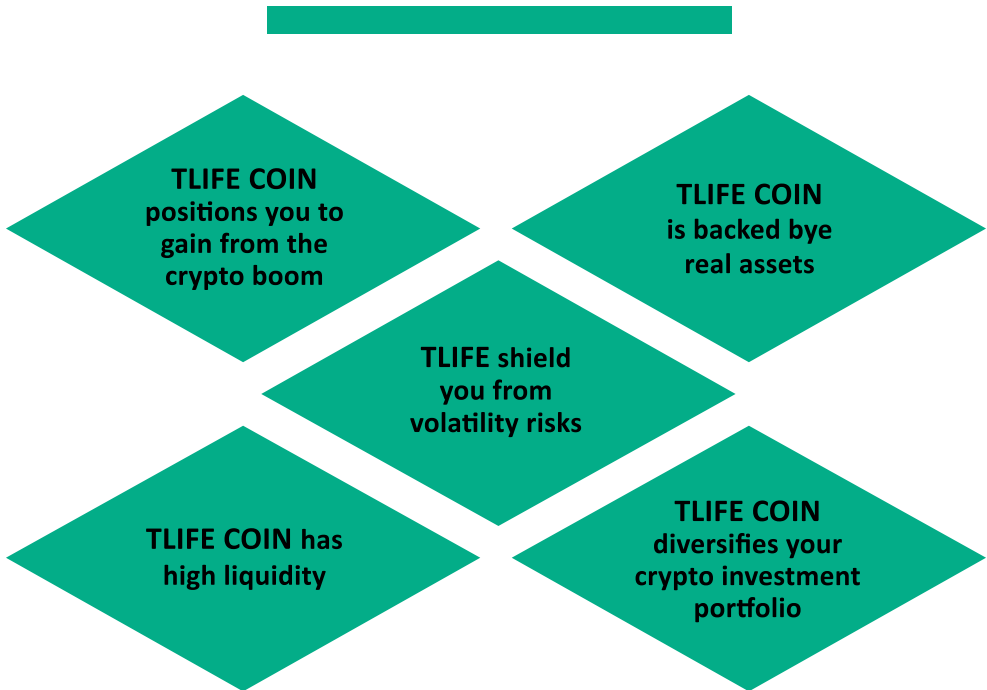

PLAY | TRADE | LEARN | MAKE MONEY | WIN

Gamers can access a variety of games at Tallwin Game Zone and pay for them with cryptocurrencies, making it a one-stop store for gamers. Building Tallwin Game Zone on top of the Binance blockchain will guarantee that all transactions are safe, quick, and transparent.
